HENS DON'T LIE
Here are the Facts:
7,500 MORE EGGS FROM 250 UNCULLED HENS FED K-BLENDED KASCO EGG PRODUCER!

Flocks fed the New Kasco Egg Producer averaged 219 eggs compared to 219.5 eggs for birds fed another popular, high quality, laying mash. That's thirty more eggs per hen on Kasco, or 7,500 more eggs from 250 layers—amazing but absolutely true!

These results were from many pens of average, uncalled, hens. No pens were selected to boost these averages. All birds were treated the same except for laying mash. Kasco fed birds actually produced eggs on one-half pound less feed per dozen.

What all these figures add up to is: $2.65 more profit from every 100 pounds of Kasco Egg Producer fed. It will pay you to feed Kasco, too.

### JERRY HOUCHINS IS POPULAR STUDENT

(Note: The following clipping has been handed from a Petersburg school paper. The subject, Jerry Houchins is the grandson of Mr. and Mrs. D. A. Conner, of Appomattox).

"One of the best known students of Bolling Junior High School is Jerry Houchins of 206, our newly elected student government head. Both teachers and pupils speak very nicely of Jerry and find him a dependable friend.

"Jerry was born on October 12, 1940, in Petersburg, Virginia. He has belonged to the Tabb Street Presbyterian Church for three years.

". . . . . He has been a member of the Glee Club, the Student Council and Library Club.

"Jerry is going to study medicine at Duke University after studying at Hampden-Sydney for two years. So far he has never failed a subject, and he has made 32 points in one year in service to his school.

"Although he makes all these points and does his school work well he keeps up with his hobby, golf. He also keeps up with football, practicing JV football every afternoon after school.

"Everything Jerry does he does well, and he has always been a great asset to BJHS.

### FOREST TREE PLANTING TIME IS HERE

Word has been received from the State Forester's Office that due to the recent rians and snow, the soil in the tree nursery is in good condition to permit safe lifting of tree seedlings by the 15th of November. It was also revealed that 1,295,000 seedlings have been made available to the Farmville 10-County District for this fall and coming spring planting season. This would plant about 130 acres per county.

Landowners interested in planting pine seedlings this year are urged to send in their "Application for Tree Seedlings" as soon as possible. A substantial number of orders have already been received. Delivery will begin soon after the trees are lifted on November 15.

Land that is badly cut-over, worn-out, eroded and idle should be planted to trees. This land does not earn a cent of the taxes that must be paid on it. Forest trees will grow on and make such land productive. Each and every acre of land should be made to produce the crop the land is best able to grow and still provide the owner a maximum cash return.

Call or write the District Forester, Box 386, Farmville for more specific information and recommendations covering your needs.

### Wax Inside of Wastebasket

Here's a neat trick to keep metal and wood wastebaskets from becoming too messy.

Just wax the inside of the wastebasket with any polishing-type wax you happen to have on hand. Dust pencil shavings, and other loose dirt will stick less to bottom and sides if the basket is waxed.

### TURKEY PRICES LOW AND ARE EXPECTED TO CONTINUE SO

Turkey prices are low, and likely will stay that way for the rest of this marketing season in Virginia.

This gloomy picture for producers from agricultural economists at VPI, shows that turkey prices are now about 5¢ below last year and are likely to remain below last year by about the same amount. There's a good reason for it: The 1954 crop of 43,000,000 heavies and 18,000,000 lights is an increase of 6 and 16½%, respectively, over last year.

Small type fryers are bringing 28 to 29¢, heavy hens about 30¢, and toms from 24 to 25¢. Unhappily for the producer, the economists say the cost of production on the turkeys now being sold averages between 28 and 32¢.

If farmers following their August intentions, perhaps a third of the 1954 production increase has been diverted away from marketing in later months. Farmers' marketing intentions for September were to sell fewer turkeys than in September 1953. If both intentions have been carried out, 69% of the 1954 turkey crop remained to be sold in October or later, compared to 71% of last year's crop.
